SHUTTLEWORTH HOUSE GETS A MAKE-OVER

Shuttleworth House has recently been refurbished

The refurbishment included upgrading the windows and installing a new heating system. The Shuttleworth House Residents' Group tells us about the residents' role in the project.

"In 2012, we formed the Shuttleworth House Residents' Group with the aim of improving Shuttleworth House and giving residents a voice. As a group, we met with the council and told them residents' concerns about how the building was cold and expensive to heat. Many of us had draughty windows and old 'trough heaters' and expensive to heat. With combined funding of £3.2 million through the council's Housing Investment Programme, and the government's ECO Scheme, the refurbishment project helped to bring about:

- Installation of a bio-mass boiler and central heating
- Fitting new thermally efficient windows
- Cladding the building to improve energy efficiency
- Putting in new LED lighting

A member of Shuttleworth House Residents' Group said:

"In the flat I live I have noticed the difference in temperature and it's brilliant that I can now enjoy heating. It shows that the council can do things when they are given the opportunity."

DID YOU KNOW?
The flats in Shuttleworth House use electric heating which is much cheaper than gas.
